

— A BRIEFING FOR OWNER-OPERATORS

Agentic ERM

Enterprise Resource Management · reimagined for the age of agents

Twenty people act as one hundred.

The agents do the work. The system improves itself.

● One source of truth

● Live data from day one

● Built for 15–50 person teams

You pay twelve vendors to disagree about what a customer is.

Your CRM thinks one thing. Your ERP thinks another. A spreadsheet thinks a third. You are the human who decides which one is real, and the real cost was never the subscription. It's everything around it.

TODAY · TWELVE TOOLS, NO AGREEMENT

CRM	ERP	Projects	Wiki
Support	Expense	Meeting AI	Accounting
Inventory	Chat	Sales eng.	AI bolt-on

€40–60k / year combined, none of them agree.

Time lost to reconciliation

Someone re-keys, checks and cross-references, all day.

Errors & missed opportunities

Decisions made on data that quietly went stale.

Growth capped by headcount

More work means more seats, not more output.

Agentic ERM: the new **operating** **core.**

It's not another tool to add to the pile. It's the unified layer that connects your data, your systems and a fleet of agents, so work flows, decisions improve, and outcomes compound.

- **Connected systems:** your stack, finally in agreement.
- **Unified & trusted data,** one entity store, one truth.
- **Intelligent by design,** agents that do the work.

THE LAYER, TOP TO BOTTOM

AI Agents

Do the work, around the clock

Unified & Trusted Data

One entity store, kept in sync both ways

Connected Systems

Every app you already use, via API

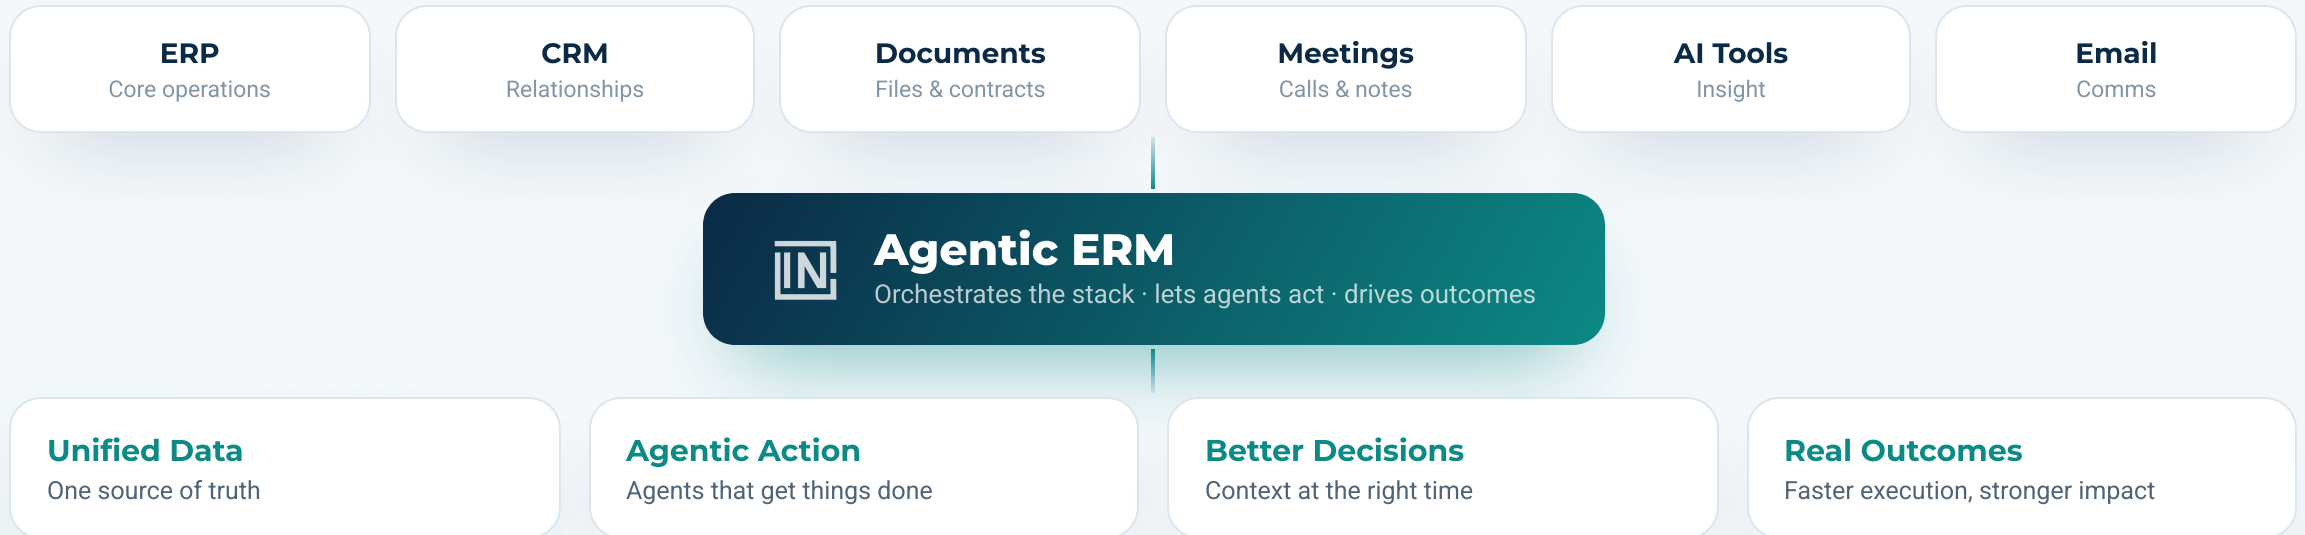

Workflows & Automation

The foundation everything runs on

It manages how **all of it works together.**

Not one ERP. Not one CRM. Not one AI tool. Every system, orchestrated as a single organism.

This is your screen on a **Tuesday morning.**

AGENT ACTIVITY, LAST 12 HOURS

- I** **Inbox Sweeper:** new RFQ → opened Opportunity #OPP-318, draft reply ready.
- L** **LinkedIn Cadence:** sent step 2 to 38 prospects. 4 replies, 1 hot.
- M** **Meeting Observer:** summarised yesterday's call, extracted 3 action items.
- B** **Inventory Anchor:** reconciled overnight scans, 2 drift events routed for review.
- F** **Feedback Loop:** reproduced a bug, drafted fix in PR #214, ran 47 tests.

NEEDS YOUR APPROVAL · 3

Sandvik Coromant UK, £6,420

Bardons & Oliver, £2,180
PO-2026-119 · routed 03:12

Every item above was written by an agent, not a human.

The CEO didn't open a second tool this morning.

Sales, marketing and content: **same OS, same data.**

Outbound isn't a separate tool. LinkedIn cadences, campaigns, newsletters and blog SEO all write to the same entity store as your projects and POs. When a prospect replies, the pipeline updates. When a customer ships, the case-study queue updates. Nothing copy-pasted, nothing siloed.

Pipeline created
flowing into the same cockpit

Every reply updates the pipeline. Every customer win becomes the next post.

A closed loop between how you grow and how you deliver, run by agents, visible in one place.

When something's wrong, the system fixes itself.

Anyone flags a problem. An agent reads it, reproduces the issue, writes the fix, and tests it against past data. A human reviews the pull request and ships. Nothing has to be roadmapped, escalated or scoped.

01 · FLAG

A human notices

"The expense agent missed VAT on an international receipt." Posted in #feedback.

02 · DIAGNOSE

An agent investigates

Pulls the receipt, confirms the misclassification, finds 11 similar cases, isolates the bug.

03 · FIX & TEST

PR #214 drafted

Fix written, 47 tests run, all 11 historical cases pass, before a human looks.

04 · SHIP

A human approves

Reviewed & shipped, zero downtime. Affected claims recomputed automatically.

~14

platform changes shipped last quarter, **every one from your team's own feedback**. Your OS becomes more yours every week. The human review never gets bypassed.

No migration. No big-bang switch.

We connect to your stack via API. Your team adopts at its own pace, nothing forced, nothing lost.

DAY 0 **API connections**

Read-only, inside your perimeter.

DAY 1 **You see your live data**

Real customers, pipeline and POs, already in the cockpit.

WK 8 **The whole team works in it**

Faster than the old tools. Sync keeps holdouts in.

DAY 90+ **Old tools retire naturally**

You cancel subscriptions because nobody opens them.

0 CSV exports needed **100%** queryable day one

Your email, calendar & drive stay exactly where they are.

Everything else is mirrored and kept in sync, no team retraining on day one.

WHY NOW

3–5×

productivity uplift. A 20-person company operating like 60–100 · same payroll, different output.

~daily

model improvements. Your agents get better with the frontier, automatically, no rework.

18 mo

category-defining window. Whoever consolidates first captures the margin, the lead times, the talent.

High-touch. Rate-locked forever.

Deep involvement from Linkenite. Sign during Phase 1 and keep your monthly rate permanently, even as pricing rises.

Pricing isn't one-size-fits-all.

The right number depends on the nature of your business, your operations, the type and volume of your data, and your headcount. We stay flexible and scope every plan with you in detail, so you only pay for what fits.

Founding rate lock: your price never rises.

Sign during Phase 1 and keep your monthly rate permanently, even as pricing increases in future phases. Start with a free trial, no card required.

**First 5 customers
only**

— SIXTY MINUTES · YOUR STACK, MAPPED

See your **live data** in the cockpit, before the first contract is signed.

We wire read-only connections to two of your systems and reserve your preview URL. You log in and see your company. No mockups, no fake names. Either you want more, or you don't. Both answers are useful.
